¹ Asset allocation (and/or diversification) does not ensure a profit or guarantee against loss; it is a method used to help manage risk.

² Fund options and associated standard mutual fund fees are as of 05/31/2025. Standard mutual fund fees, ranging from 0.61%-3.03% net, also apply.

³ Dollar cost averaging does not ensure profit or protect against loss in a declining market. Such a plan involves continuous investment in securities regardless of fluctuating price levels of such securities. Investors should consider their financial ability to continue purchases through periods of low price levels.

Before making any rollover decisions, you must carefully consider all available retirement plan options including leaving the money in the current plan (which may be beneficial in certain circumstances), rolling the money to the new employer's plan, installment and annuity payments (if available) and IRA rollovers. The key factors for the decision include: 1) investment options, 2) fees and expenses (including both investment options and account-related fees and expenses), 3) differing service levels available, 4) withdrawal penalties, 5) creditor and legal protections, 6) required minimum distributions, 7) employer stock, 8) income needs, and 9) tax impact and penalties. Tax consequences will vary and you should consult with a tax or legal professional.

Investing in mutual funds involves risk, including potential loss of investment. You should consider the fund's investment objectives, risks, charges, and expenses carefully before investing. The prospectus and/or summary prospectus contain this and other information. You may contact your financial professional, visit srsrivewell.com/individual-investors-mfpira-prospectuses, or call 866-747-3421 to obtain a current fund prospectus. Please read it carefully before investing.

You should also consider the expenses of the IRA program before investing. You must receive a fund prospectus and the LiveWell® Plus Mutual Fund IRA disclosure form before investing.

IRAs are considered a long-term investment. Withdrawals from a Traditional or SEP-IRA are generally subject to income taxes, and if taken before age 59½, may be subject to an additional 10% IRS tax penalty. Withdrawals from a Roth IRA are generally not subject to income tax provided certain requirements are met. Information on Traditional, Roth, and SEP-IRAs is available in the LiveWell® Plus Mutual Fund IRA disclosure.

Sammons Institutional Group®, Inc. and Sammons Financial Network®, LLC., member FINRA, do not give tax, legal, or investment advice. Please consult with and rely on your own tax, legal, or investment professional(s). Taxes are payable upon withdrawal of funds, and a 10% IRS penalty may apply to withdrawals prior to age 59½.

For six years after the IRA is opened, an Early Withdrawal Charge ("EWC") will apply to withdrawals in excess of the annual EWC-free amount. See the LiveWell® Plus Mutual Fund IRA Certificate of Disclosure for details.

*Standardized Total Returns w/Recordkeeping Fees are calculated using gross fund fees and the maximum recordkeeping fee of 0.80%. Standardized Total Returns w/Recordkeeping Fees assume reinvestment of dividends and capital gains and are adjusted to reflect sales charges and ongoing fund expenses. The charges and expenses used in these returns are obtained from the most recent prospectus and/or shareholder report available to Morningstar.

The LiveWell Plus with the 3% Account Bonus has been designed for individuals with long-term investment horizons of six years or more. As a result, there is an Early Withdrawal Charge (EWC) for taking early withdrawals or withdrawals that exceed certain limitations.

An Early Withdrawal Charge (EWC) will be applied to withdrawals in excess of 10% of your Account Anniversary Value (or Required Minimum Distribution amount if greater) within six years of the Account Anniversary. The date your first contribution is received is known as your Account Anniversary. This includes withdrawals made by your beneficiary following your death. The EWC is eliminated six years after opening the IRA.

1. Total Return 1 Mo

Expressed in percentage terms, Morningstar's calculation of total return is determined by taking the change in price, reinvesting, if applicable, all income and capital gains distributions during the period, and dividing by the starting price. In this case, this is the total return for a one-month time period. Unless otherwise noted, Morningstar does not adjust total returns for sales charges (such as front-end loads, deferred loads, and redemption fees), preferring to give a clearer picture of performance. Total returns do account for the expense ratio, which includes management, administrative, 12b-1 fees, and other costs that are taken out of assets. Total returns for periods longer than one year are expressed in terms of compounded average annual returns (also known as geometric total returns), affording a more meaningful picture of fund performance than non-annualized figures.

2. Total Return 3 Mo

Expressed in percentage terms, Morningstar's calculation of total return is determined by taking the change in price, reinvesting, if applicable, all income and capital gains distributions during the period, and dividing by the starting price. In this case, this is the total return for a three-month time period. Unless otherwise noted, Morningstar does not adjust total returns for sales charges (such as front-end loads, deferred loads, and redemption fees), preferring to give a clearer picture of performance. Total returns do account for the expense ratio, which includes management, administrative, 12b-1 fees, and other costs that are taken out of assets. Total returns for periods longer than one year are expressed in terms of compounded average annual returns (also known as geometric total returns), affording a more meaningful picture of fund performance than non-annualized figures.

3. Total Return Calendar Quarter

Expressed in percentage terms, Morningstar's calculation of total return is determined by taking the change in price, reinvesting, if applicable, all income and capital gains distributions during the period, and dividing by the starting price. In this case, this is the total return for the calendar quarter time period. This information is updated on the following dates: 3/31, 6/30, 9/30 and 12/31. Unless otherwise noted, Morningstar does not adjust total returns for sales charges (such as front-end loads, deferred loads, and redemption fees), preferring to give a clearer picture of performance. Total returns do account for the expense ratio, which includes management, administrative, 12b-1 fees, and other costs that are taken out of assets. Total returns for periods longer than one year are expressed in terms of compounded average annual returns (also known as geometric total returns), affording a more meaningful picture of fund performance than non-annualized figures.

4. Total Return YTD

Expressed in percentage terms, Morningstar's calculation of total return is determined by taking the change in price, reinvesting, if applicable, all income and capital gains distributions during the period, and dividing by the starting price. In this case, this is the total return for year-to-date. Unless otherwise noted, Morningstar does not adjust total returns for sales charges (such as front-end loads, deferred loads, and redemption fees), preferring to give a clearer picture of performance. Total returns do account for the expense ratio, which includes management, administrative, 12b-1 fees, and other costs that are taken out of assets. Total returns for periods longer than one year are expressed in terms of compounded average annual returns (also known as geometric total returns), affording a more meaningful picture of fund performance than non-annualized figures.

5. Total Return One Year

This figure shows the fund's total return over a one-year period. Annual total returns are calculated on a calendar-year and year-to-date basis. Total return includes both capital appreciation and dividends. The year-to-date return is updated daily. For mutual funds, return includes both income (in the form of dividends or interest payments) and capital gains or losses (the increase or decrease in the value of a security). Morningstar calculates total return by taking the change in a fund's NAV, assuming the reinvestment of all income and capital gains distributions (on the actual reinvestment date used by the fund) during the period, and then dividing by the initial NAV. Unless marked as load-adjusted total returns, Morningstar does not adjust total return for sales charges or for redemption fees. Total returns do account for management, administrative, and 12b-1 fees and other costs automatically deducted from fund assets.

6. Total Return Annualized Three Year

This figure is the fund's total annualized return over a three-year period. Expressed in percentage terms, Morningstar's calculation of total return is determined by taking the change in price, reinvesting, if applicable, all income and capital gains distributions during the period, and dividing by the starting price. Unless otherwise noted, Morningstar does not adjust total returns for sales charges (such as front-end loads, deferred loads, and redemption fees), preferring to give a clearer picture of performance. Total returns do account for the expense ratio, which includes management, administrative, 12b-1 fees, and other costs that are taken out of assets. Total returns for periods longer than one year are expressed in terms of compounded average annual returns (also known as geometric total returns), affording a more meaningful picture of fund performance than non-annualized figures.

Unless otherwise noted, Morningstar does not adjust total returns for sales charges (such as front-end loads, deferred loads, and redemption fees), preferring to give a clearer picture of performance. Total returns do account for the expense ratio, which includes management, administrative, 12b-1 fees, and other costs that are taken out of assets. Unless otherwise noted, Morningstar does not adjust total returns for sales charges (such as front-end loads, deferred loads, and redemption fees), preferring to give a clearer picture of performance. Total returns do account for the expense ratio, which includes management, administrative, 12b-1 fees, and other costs that are taken out of assets.
