Investing Principles

THE REWARDS OF LONG-TERM INVESTING

The odds have favored investors who take a long-term approach. Sticking to a long-term investment strategy pays off. Average stock market returns are mostly positive over time.

POSITIVE PERFORMANCE OVER TIME

If you have questions about your equity portfolio, ask your financial advisor — who can help you decide whether adjustments may be appropriate based on changes in your financial situation (including your risk tolerance, time horizon and investment objectives).

Positive versus negative average annual returns for the S&P 500 (1937–2017)

Though the stock market's returns vary tremendously, the average returns for the S&P 500 were positive in 76% of the years from 1937 to 2016.

10.4% average annual return: 1937–2017

62 positive years | 19.4% average positive return

19 negative years | -12.6% average negative return

Source: Legg Mason. Each calendar year listed in chart reflects average annual performance from December 31 of prior year to December 31 of listed year. Returns prior to 1957 are representative of the S&P 90 Index, a value-weighted index based on 90 stocks. Performance shown reflects the effects of dividend reinvestment. This chart is for illustrative purposes only and does not represent actual performance, past or future, of any investment. **Past performance is no guarantee of future results.**

The **S&P 500 Index (S&P 500)** is an unmanaged index of 500 stocks that is generally representative of the performance of larger companies in the U.S. Performance does not reflect the impact of fees and expenses. Investors cannot invest directly in an index. Unmanaged index returns do not reflect any fees, expenses or sales charges.

WHY IT CAN PAY TO STAY INVESTED

Stocks are generally more volatile than fixed income, and returns can vary greatly from year to year. As a result, stock investors may be tempted to abandon a long-term strategy when the markets are down. However, it pays to stick to a plan and stay invested for the long term.

Steady growth is the exception, not the rule

S&P 500 Index: Annual total returns 1998-2017 (%) ending on December 31, 2017

Although stocks have averaged a 10.4% annual return since 1937, the return can be far higher or lower in any single year.

Long-term investors should consider the pattern of returns over the last 20 years and not be thrown off course by the market's ups and downs along the way: Steady, continuous growth is the exception, not the rule.

A few days can make a difference

\$10,000 Investment made to S&P 500 Index from January 2, 1998–December 31, 2017

Pulling money out of stocks in down periods can reduce long-term returns, because when the market bounces back, it can happen suddenly and quickly. Missing even a few trading days could mean missing some of the market's biggest gains.

There were 5,052 trading days during this 20-year period ... yet missing only 10 of them would reduce an investor's returns by 50%.

Source: Legg Mason. **Past performance is no guarantee of future results.** All investments involve risks, including loss of principal. The chart provided is for illustrative purposes only and represents an unmanaged index in which investors cannot directly invest. The data in the chart is based on 260 trading days in a year.

The Advisor Partnership Program (TAPP)[®] **Our Experience. Your Potential.[®]**

The Advisor Partnership Program (TAPP)[®] is Legg Mason's landmark value-added offering, featuring a wide range of multidimensional workshops and seminars that empower financial advisors to build successful practices and educate their clients. TAPP delivers value in three areas of importance to advisors: Practice Management, Addressing Client Needs, and Investor Education. **Practice Management** offers comprehensive resources for developing a value proposition and client acquisition. **Addressing Client Needs** provides in-depth materials to help advisors engage and inform their clients on a variety of topics. **Investor Education** offers valuable resources to keep you and your clients informed.

Where can I find more information?

History tends to repeat itself. Legg Mason seeks to ensure that your portfolio can withstand and recover from the inevitability of market corrections and portfolio losses, with a balance of strategies that addresses your need for portfolio growth, income, capital appreciation and risk management. Talk to your financial advisor today about the right investing strategy for your situation.

What should I know before investing?

All investments involve risk, including possible loss of principal. Equity investments generally provide an opportunity for more capital appreciation than fixed income investments, but they are subject to greater market fluctuations.
