LiveWell Dynamic Annuity®

A registered index-linked variable annuity issued by Midland National® Life Insurance Company

Balance performance and protection. Gain clarity and control.

Registered index-linked variable annuity products are complex insurance and investment vehicles. Upside growth potential is limited by contract terms and downside protection is subject to level selected. Before you purchase the contract, you should read the prospectus carefully. Annuities are long-term investment vehicles and may be subject to surrender charges for early withdrawals.

NOT FDIC/NCUA INSURED, MAY LOSE VALUE INCLUDING LOSS OF PRINCIPAL, NO BANK/CU GUARANTEE, NOT A DEPOSIT, NOT INSURED BY ANY FEDERAL GOVERNMENT AGENCY.

Balancing performance and protection

When it comes down to it, retirement planning can be boiled down into two major goals—growing your money and protecting your money—which is why planning for retirement can feel like a balancing act between the two.

Growing your money and trying to protect it can sometimes feel at odds with each other.

That's because seeking to aggressively grow your retirement savings means taking on a higher level of risk.

But as retirement draws closer, your risk appetite likely suppresses, and for good reason ... you have less time to recoup losses should a market downturn take place. **So how can you grow your retirement savings while protecting a portion of it from market downturns?**

Registered index-linked variable annuities—like the LiveWell Dynamic Annuity® issued by Midland National® Life Insurance Company—were created to help address this risk vs. reward conundrum.

How much risk are you comfortable with?

How much protection do you need?

The LiveWell Dynamic Annuity allows you to:

- ✓ Participate in upside growth potential.
- ✓ Choose your level of protection from market downturns.
- ✓ Gain clarity with a clear understanding of the investment performance through the ability to access the interim value of each active Cycle on any given business day.
- ✓ Have more control of your investments with Anytime AllocationSM.

Could a registered index-linked variable annuity be right for you?

Registered index-linked variable annuities offer unique investment strategies intended to help balance performance and protection through index strategies and variable separate accounts.

Depending on your investment elections, registered index-linked variable annuities allow you to participate in market upswings and partially protect from market downturns.

They're also known as hybrid, structured, buffered, and registered annuities.

The LiveWell Dynamic Annuity offers you the flexibility you may need to easily adjust your retirement savings strategy due to market moves or life changes.

Managing market volatility

As you'll see from the S&P 500® Index data shown in the following pages, index gains have occurred, but index losses can happen. Putting a plan in place to protect a portion of your savings from those losses may help you reach your long-term retirement goals.

While the market, as represented by the S&P 500® Index, has grown consistently over time, market downturns are inevitable, and they may take a toll on your retirement savings. **By investing a portion of your assets in a registered index-linked strategy that offers a level of protection, you can reduce the amount of losses during big market downswings.**

63 positive years
18.11% average positive return

¹ Source: Sammons Institutional Group®, Inc. Each calendar year listed in chart reflects average annual performance from December 31 of the prior year to December 31 of the listed year. Returns prior to 1957 are representative of the S&P 90 Index, a value-weighted index based on 90 stocks. Performance does not include dividends. This chart is for illustrative purposes only and does not represent actual performance of any specific investment. Past performance does not guarantee future results.

The S&P 500 Index is an unmanaged index of 500 stocks that is generally representative of the performance of larger companies in the U.S. Performance does not reflect the impact of fees and expenses. Investors cannot invest directly in an index. Unmanaged index returns do not reflect any fees, expenses or sales charges.

Analyzing the past when planning for the future

The adage of “good things come to those who wait” is typically true for investors who stay their course. As you can see in the chart below, dramatic differences in gains can occur by missing days—not years—of market exposure. Keep in mind, past performance is not an indication of future returns.

When the market takes a downward turn, emotions can be high, and many people may wonder if they should pull their money out of the market. Have you experienced this feeling before?

If you succumb to this urge and pull out of the market, **you may miss the upside growth potential that often follows a downward turn**, which may impact your long-term returns.

To further explore historical performance, the table below shows the frequency of gains and losses during 1-, 3-, and 6-year rolling monthly periods based on historical index price returns of the S&P 500® Index.

¹ Source: Sammons Institutional Group®, Inc. All periods shown above are based on rolling monthly periods from February 1928 to July 2023. Returns prior to 1957 are calculated using the S&P 90 Index, a value-weighted index based on 90 stocks. Performance shown does not include dividends. Past performance does not guarantee future results. All investments involve risks, including loss of principal. The chart provided is for illustrative purposes only and represents an unmanaged index in which investors cannot directly invest.

Choosing the right level of protection for you

Finding a balance between risk and reward can be challenging. If you risk everything, you have no protection. If you protect everything, your growth opportunities are limited.

Market volatility is a constant. Consumers have participated in historic gains and historic losses. When choosing an investment strategy, consider the gain needed to recover from the varying portfolio losses listed in the chart below. The greater the loss, the greater the gain needed to break even.

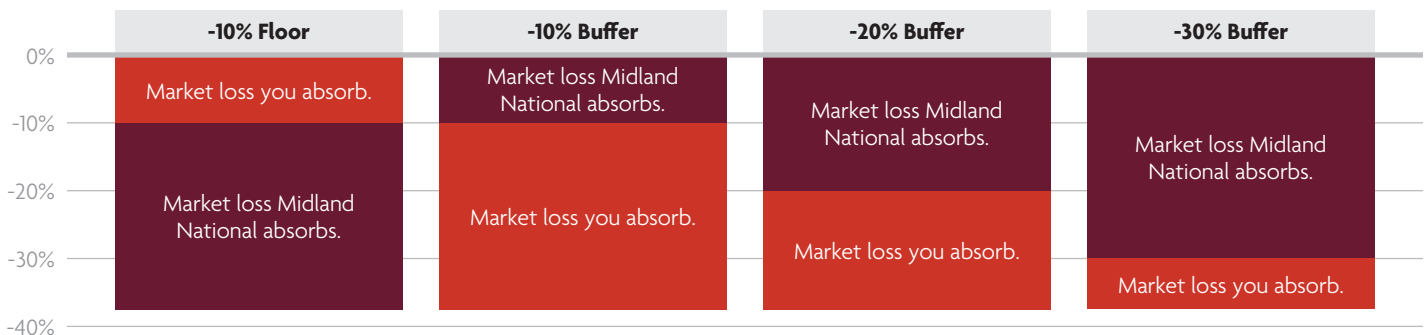

| If a portfolio loses | -10% | -15% | -20% | -25% | -30% | -35% | -40% | -45% | -50% |
|--|-------|-------|------|-------|-------|-------|-------|-------|------|
| Return needed to break even after 1 year | 11.2% | 17.7% | 25% | 33.4% | 42.9% | 53.9% | 66.7% | 81.9% | 100% |

The LiveWell Dynamic Annuity allows you to choose the right level of protection for you with Cycle index account investment options.¹

Floors and buffers provide partial protection

Cycle index account investment options offer both floors and buffers to provide a level of protection for your hard-earned retirement savings. The protection provided by floors and buffers is applied at the Cycle maturity date.

- **Floor:** Floors provide stop-loss protection, meaning **your losses stop once they've hit the floor**. If losses extend beyond the floor, Midland National absorbs additional losses. Floors are designed to protect against large market downswings.
- **Buffer:** Buffers provide first-loss protection that Midland National absorbs, meaning **your first losses are protected until the buffer is met**. If losses extend beyond the buffer, you absorb the additional losses. Buffers are designed to protect against minor market hiccups.

With the LiveWell Dynamic Annuity, you have access to both floors and buffers. You can blend these two protection strategies by investing in multiple Cycles at once. Your financial professional can help you determine the level of protection you need based on your individual risk tolerance.

You can blend floors and buffers by investing in multiple Cycles at once.

¹ The risk of loss occurs each time you move into a new Cycle indexed account after the end of an indexed term. The protection level option selected in the indexed account helps protect you from some downside risk. If the negative return is in excess of the protection level selected, there is a risk of loss of principal. Protection levels that vary based on the index and term selected are subject to change and may not be available with every option. Please see the prospectus for details.

Investing your money your way

The LiveWell Dynamic Annuity allows you to grow your money when the market is up and partially protect your money when the market is down. You're able to select your level of protection and allocate amongst the available investment options that align best with your risk tolerance and long-term retirement goals.

You can allocate your money among two accounts:

1 Cycle index account investment options (Cycles)

Cycles offer varying levels of protection, three different index options, and 1-, 3-, or 6-year term lengths.¹

In exchange for partial protection on market downturns, the growth potential in Cycles is subject to a specific Cap Rate.

- **Cap Rate:** The maximum rate that will be credited to a Cycle on the maturity date.

The LiveWell Dynamic Annuity also offers a **bailout feature**. If the rate(s) assigned to your Cycle isn't satisfactory to you, you're able to "bail out" of the Cycle and reallocate to a different Cycle or variable separate account investment option.

All you need to do is notify us within 10 business days from the day you're notified of the final rate(s).²

| | Index | Protection level | Crediting strategy |
|-------------------|----------------|------------------|--------------------|
| 1-year Cycle term | S&P 500® Index | -10% buffer | Cap Rate |
| | S&P 500® Index | -10% floor | Cap Rate |
| 3-year Cycle term | S&P 500® Index | -10% buffer | Cap Rate |
| | S&P 500® Index | -10% floor | Cap Rate |
| 6-year Cycle term | S&P 500® Index | -20% buffer | Cap Rate |
| | S&P 500® Index | -30% buffer | Cap Rate |
| | S&P 500® Index | -10% floor | Cap Rate |

Not all Cycle index account investment options are available in all states or financial institutions.

No contract fees are assessed while funds are in the Cycles.

Gain clarity on investment performance. With the option to view the interim value of each active Cycle on any given business day by accessing your account online, you can have a clear and current understanding of where you stand.

¹ At contract purchase, money initially designated for a Cycle investment will be placed in a default account at issue and will transfer into the Cycle on the Cycle start date.

² Bailout feature timeline may vary by state, but it will never be less than 10 business days.

2 Variable separate account investment options

The LiveWell Dynamic Annuity offers variable separate account investment options from some of the nation's most well-known money managers that provide additional growth potential and diversification opportunities.

The variable separate account can help:

- ✓ Maximize your retirement savings potential.
- ✓ Provide access to multiple market sectors.
- ✓ Diversify your money within a single investment platform.

The variable separate account offers unlimited growth potential, but there's no downside protection, including possible loss of principal.

| Equity | Fixed income | Money market |
|--|--|--|
| <ul style="list-style-type: none">American Funds IS® Global Growth 4ClearBridge Variable Small Cap Growth IIDWS Equity 500 Index VIP B | <ul style="list-style-type: none">Western Asset Core Plus VIT II | <ul style="list-style-type: none">Fidelity VIP Government Money Market Service Class 2 |

Contract charges and separate account fees are only assessed on the portion of your money that's invested in the variable separate accounts and the default account.¹

¹ Investment options and associated fees are as of 9/1/2023 and are subject to change. Standard variable separate account option fees, ranging from 0.49%-1.05%, also apply. Separate account annual expenses include a mortality and expense (M&E) annual fee (0.80%) and asset-based administrative charge annual fee (0.35%).

Gaining control of your investment

Leverage unique flexibility with Anytime AllocationSM

The LiveWell Dynamic Annuity gives you greater control of your investment with the **Anytime Allocation feature**. With Anytime Allocation, **you don't have to wait until a future anniversary date or the end of a term to make adjustments and reallocate your portfolio**. You can adjust in real time with no penalties. You choose when and where to reallocate with no waiting period and no allocation fees.

Anytime Allocation is available to you at no extra cost. It's important to note, though, that account allocation adjustments are not automatic. You must initiate the transaction.

With Anytime Allocation, you can reallocate penalty-free ...

- ✓ **Any amount:** Partial or full Cycle amount
- ✓ **Anytime:** No waiting—you can reallocate at any time during a Cycle
- ✓ **Anywhere:** New Cycle, separate accounts, or any combination of options. No investment restrictions other than you cannot enter a Cycle that's already begun.

Anytime Allocation: A hypothetical case study

PROFILE: A 55-year-old individual who plans to retire in 10 years. After enduring 2008's financial crisis and 2020's Coronavirus crash, this investor knows what a big market downturn can do to their retirement savings. While wary of market downturns, this investor is not ready to throw in the towel on more aggressive growth opportunities.

OBJECTIVE: Protect a portion of retirement savings from market downturns, participate in market upswings when possible, and pivot investment strategies if the market moves or the retirement plan is altered.

SOLUTION: After consulting with a financial professional, this individual invests \$100,000 into the LiveWell Dynamic Annuity with a 6-year S&P 500® Index -20% buffer Cycle.

Will the market keep going up or is another downturn on the horizon? Like many others, this investor is unsure ... so \$45,000 in gains is credited and diversified among three Cycles.

Hypothetical example only. Does not reflect actual historical performance and is not a guarantee of future results.

Any increase in value from holding a Cycle until maturity that is moved to another Cycle is still exposed to some market risk and may lose value.

Hypothetical case study continued

Continuing on with the example from the previous page, an individual invested \$100,000 into a 6-year Cycle with a -20% buffer. **For this example, we'll diversify the \$45,000 increase, but keep in mind, you can allocate your full premium in whatever way you choose at any time.**

This individual has a \$45,000 increase in value from this Cycle and is not confident about where the market is headed but would like to capture upside growth potential when possible, while also protecting a portion of premium should the market fall.

ANYTIME ALLOCATION IN ACTION: With the ability to view the interim value of each active Cycle on any given business day, this individual was able to track the underlying index and diversify their increase in value by investing in three different Cycles with differing protection levels and crediting strategies.

Hypothetical example only. Does not reflect actual historical performance and is not a guarantee of future results.

Any increase in value from holding a Cycle until maturity that is moved to another Cycle is still exposed to some market risk and may lose value.

Regardless of how you allocate your premium initially or subsequently, **you're always able to adjust your allocations at any time.** This flexibility gives you greater control over your money and allows you to adjust your allocations as market moves occur or life circumstances change.

The flexibility offered with the LiveWell Dynamic Annuity can help you diversify your money. Depending on your tolerance for risk, current market conditions, and other factors, you may swing between an offensive and defensive investment strategy throughout your retirement planning journey, so **you should have a financial product that can adjust with you.**

The LiveWell Dynamic Annuity can help provide more flexibility and greater control of your investment.

Asset allocation and/or diversification do not ensure a profit or guarantee against loss; they are methods used to help manage risk.

| Surrender charge period | <table><tr><td>Years since premium deposit⁴</td><td>0</td><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6+</td></tr><tr><td>Percent of contract value subject to surrender charge</td><td>8%</td><td>7%</td><td>6%</td><td>5%</td><td>4%</td><td>3%</td><td>0%</td></tr></table> | | | | | | | | Years since premium deposit ⁴ | 0 | 1 | 2 | 3 | 4 | 5 | 6+ | Percent of contract value subject to surrender charge | 8% | 7% | 6% | 5% | 4% | 3% | 0% |
| Years since premium deposit ⁴ | 0 | 1 | 2 | 3 | 4 | 5 | 6+ | | | | | | | | | | | | | | | | | |
| Percent of contract value subject to surrender charge | 8% | 7% | 6% | 5% | 4% | 3% | 0% | | | | | | | | | | | | | | | | | |
| Free withdrawal amount ⁵ | <p>Starting in year two, the free withdrawal amount is 10% of remaining premiums less than six years old at the beginning of the contract year, or required minimum distribution (RMD), if greater.</p> <p>Any remaining premiums six years old or older are also considered a free withdrawal and no penalties would apply.</p> | | | | | | | | | | | | | | | | | | | | | | | |
| Standard death benefit ⁶ | Equal to the accumulation value when proof of death is received, payment type is elected, and any other applicable forms are in good order. | | | | | | | | | | | | | | | | | | | | | | | |

¹ Money allocated to the Cycle index account will be transferred to the default account at issue. On the Cycle start date, money will transfer from the default account to the Cycle index account. If a Cycle does not launch, money will remain in the default account until new allocation instructions are received. Fees may be assessed should the funds remain in the default account. Once a Cycle has launched, additional investments into that Cycle are not allowed.

² Number of funds, investment options, and associated fees are as of 9/1/2023. Standard variable separate account option fees, ranging from 0.49%-1.05%, also apply.

³ Dollar cost averaging does not ensure profit or protect against loss in a declining market. Such a plan involves continuous investment in securities regardless of fluctuating price levels of such securities. Investors should consider their financial ability to continue purchases through periods of low price levels.

⁴ Surrender charges are assessed on amounts withdrawn in excess of the free withdrawal amount and are based on the number of years since each premium payment.

⁵ The free withdrawal amount is available for withdrawal without a surrender charge. The amount is calculated at the beginning of each policy year. It is noncumulative. While you always have access to your money, for withdrawals taken in excess of this amount, a surrender charge will apply. Remaining premium is the sum of the premium deposits made less the partial withdrawal taken.

⁶ A contract must be in force to garner a death benefit. The value is not available as a lump sum withdrawal or at surrender. Please see the prospectus for details and state-specific information.

Helping you enjoy a life of living well

We know you want to live well and retire well. But in order to do that, you need your retirement funds to last. As a division of Sammons Institutional Group®, Inc., Sammons Retirement Solutions® specializes in portfolio-management solutions, such as mutual fund IRAs, variable annuities, and fixed and fixed index annuities.

Annuities are issued by Midland National® Life Insurance Company. Sammons Institutional Group and Midland National are wholly owned subsidiaries of Sammons® Financial Group, Inc.

Let's work together. Now is the time to work with your financial professional to develop a strong retirement plan you believe in. In the meantime, see if your values align with ours and if our simple, innovative, and straightforward solutions may be right for you. Visit srlivewell.com.

A.M. Best is a large third-party independent reporting and rating company that rates an insurance company on the basis of the company's financial strength, operating performance, and ability to meet its obligations to policyholders. S&P Global Ratings is an independent, third-party rating firm that rates on the basis of financial strength. Fitch Ratings is a global leader in financial information services and credit ratings. Ratings shown reflect the opinions of the rating agencies and are not implied warranties of the company's ability to meet its financial obligations. The above ratings apply to Midland National's financial strength and claims-paying ability. These ratings do not apply to the safety or performance of the variable separate accounts which will fluctuate in value. **A)** A.M. Best rating affirmed on August 29, 2023. For the latest rating, access ambest.com. **B)** Awarded to Midland National® as part of Sammons® Financial Group Inc., which consists of Midland National® Life Insurance Company and North American Company for Life and Health Insurance®. **C)** S&P Global Ratings' rating assigned February 26, 2009 and affirmed on May 24, 2023. **D)** Fitch Ratings' rating affirmed an Insurer Financial Strength rating of A+ Stable on December 7, 2022. The rating reflects the organization's strong business profile, low financial leverage, very strong statutory capitalization, and strong operating profitability supported by strong investment performance. An investment in the LiveWell Dynamic Annuity® is subject to the risk of poor investment performance and can vary depending on the performance of the investment options you choose. Each investment option has its own unique risks. You should review the investment options before making an investment decision. The prospectus and/or summary prospectus contain this and other information. You can visit srlivewell.com/prospectus, or call 866-747-3421 to obtain a current prospectus for the LiveWell Dynamic Annuity and its underlying investment options.

The risk of loss occurs each time you move into a new Cycle Indexed Account after the end of an indexed term. The protection level option selected in the indexed account helps protect you from some downside risk. If the negative return is in excess of the protection level selected, there is a risk of loss of principal. Protection levels that vary based on the index and term selected are subject to change and may not be available with every option. Please see the prospectus for details.

The LiveWell® suite of variable annuities (AS135A, AS204A, ICC11-AS135A, AS153A, ICC18-AS153A (contract) and AR394A, AR276A, ICC14-AR276A, AR346A, ICC16-AR346A, AR381A, ICC20-AR381A (riders and endorsements) is issued by Midland National® Life Insurance Company, 8300 Mills Civic Parkway, West Des Moines, Iowa 50266. The LiveWell® suite of variable annuities is not available in New York. Variable products are distributed by Sammons Financial Network®, LLC., member FINRA. Sammons Institutional Group®, Inc. provides administrative services. Sammons Financial Network®, LLC., Midland National® Life Insurance Company and Sammons Institutional Group®, Inc. are affiliated companies and wholly owned subsidiaries of Sammons® Financial Group, Inc. Sammons Retirement Solutions® is a division of Sammons Institutional Group®, Inc.

Product and feature availability may vary by state and financial institution.

Investing in the LiveWell Dynamic Annuity® is subject to the risks related to the Company. Any obligations, guarantees, or benefits are subject to the claims-paying ability of Midland National® Life Insurance Company, their long-term ability to make such payments, and are not guaranteed by any other party. There is no guarantee they will be able to meet our claims paying obligations; there are risks to purchasing any insurance product.

This brochure is neither an offer to sell nor a solicitation to buy. Before purchasing this product, you must receive a current variable annuity prospectus that includes information regarding risk factors, fees, expenses, investment objectives, and policies. Read the prospectus carefully before you invest any money. No variable product offers any guaranteed rate of return.

There is no additional tax-deferral benefit for an annuity contract purchased in an IRA or other tax-qualified plan.

Registered index-linked variable annuity products are complex insurance and investment vehicles. Please reference the prospectus for information about the levels of protection available and other important product information.

Sammons Institutional Group®, Inc., Sammons Financial Network®, LLC., and Midland National® Life Insurance Company do not give tax, legal, or investment advice. Please consult with and rely on your own tax, legal, or investment professional(s). Taxes are payable upon withdrawal of funds, and a 10% IRS penalty may apply to withdrawals prior to age 59½.
