## Talk with your financial professional about Franklin Templeton investments you can use to build a portfolio for both bull and bear markets.

All investments involve risks, including possible loss of principal. Stock prices fluctuate, sometimes rapidly and dramatically, due to factors affecting individual companies, particular industries or sectors, or general market conditions.
Past performance does not guarantee future results.

[^0]
[^0]:    1. In this illustration the market is represented by the Dow Jones Industrial Average. Sources: © 2023 Ned Davis Research, Inc., Dow Jones \& Company, Inc. Ned Davis Research defines a bear market as a $30 \%$ drop in the Dow Jones Industrial Average after 50 calendar days or a $13 \%$ decline after 145 calendar days. A bull market requires a $30 \%$ rise in the Dow Jones Industrial Average after 50 calendar days or a $13 \%$ rise after 155 calendar days. Average frequency, duration and market decline/increase does not reflect the current bear/bull market. Indexes are unmanaged and one cannot invest directly in an index. Index returns do not reflect any fees, expenses or sales charges.
